### COL. WALL OFFERS USE OF MILL

Second Letter Written President MacNeill Regarding Utah Copper Matter.

TRIFLING COST OF TEST IS ALLEGED

Guarantees Net Earnings Will Be Trebled If Substitute Is Used.

Col. E A. Wall yesterday made public a letter which he transmitted to Charles M. MacNeill, president of the Utah Copper company. The letter, which is selfexplanatory, follows:

"Salt Lake City, January 31, 1906. Mr Charles M. MacNelli, president "Mr Charles M. MacNell, president Utah Copper company, New York City. My Dear Sir.—Since my communication of the 24th Inst. I find upon examination of a copy of a letter written by Manager Jackling, dated Republic. Wash. March 2, 1891, and addressed to Maj. R. G. Edwards Leckke, at same place (which was received by me by mall from the hand of Mr. Jackling), that according to his statements as set forth in the letter, he obtained exceptionally favorable results in the concentration of several hundred tons of the ores from our mine by crushing the ore with our little five-stamp mill, and treating the product upon Wilfley tables, as long age as 1899, and doubtless forgotten by Mr. Jackling.

"Trusting that any information that will aid in the solution of the seeming vexed problem will be acceptable. I quote from Mr. Jackling's letter as follows:

"During the summer of 1899 I undertok some metallurgical experiments on this ore and concentrated several hundred tons taken from the tunnels and dumps at random. The mill which I used was an abandoned five-stamp mill, without any particular adaptation to the ore, and without appliances for making a close saving.

By crushing with light stamps to Utah Copper company, New York City.

saving

"By crushing with light stamps to twenty-five or thirty mesh and concord twenty-five or thirty mesh and concord silvers of any kind and without any special endeavor to save values from the firge amount of slimes produced. I made a saving of 17-10 per cent. Some exhibits of the concern of the concern of the corper values, but I shall so the concern of the corper values, but I shall so the concern of the corper values. But I shall so the concern of the corper values but I shall so the corper values but I shall so the corper of the corper values but I shall so the corper values but I shall s

Ore and Bullion.

The ore and bullion receipts for Thursday, given by McCornick's bank, were as follows: Ore, \$23,500, bullion, \$27,700.

#### **NEW MINING PAPER** TO MAKE APPEARANCE

Intermountain Miner Will Soon Be Publishing News of Mining Utah.

A new weekly mining journal will soon make its appearance in local mining cir-cies, with Fitz-Mac, the noted mining authority and writer, as its editor. Volney B. Leonard, who has made a great sucng properties and stocks, will be the own er of the new publication.

The Intermountain Miner.

Mr. Leonard has just arrived in Salt Lake from Goldfield and states that in the future his headquarters will be located here. He states that while the name of the new journal has not yet been definitely decided upon, it will probably be known as "The Intermountain Miner." The first issue of the journal will appear February 15, and it will be devoted to the mining interests of the entire West.

Snow Lowered Prices.

In conversation with a representative of The Tribune Thursday Mr. Leonard gave a brief review of the conditions at Goldfield and other camps of southern Nevada. Goldfield, he states, is going ahead with great bounds, notwithstanding the great excitements of other camps of later discovery. The Goldfield stock exchange is materially assisting in pushing Goldfield to the front. The Goldfield market, Mr. Leonard states, experienced a slump about a week ago, but it is gradually recovering and the outlook is again excellent. The slump, he states, was generally attributed to the fact that the wires between the San Francisco and Goldfield exchanges were down, in consequence of heavy snowstorms, and the fact that the other was doing caused the prices to go down. In conversation with a representative of he Tribune Thursday Mr. Leonard gave

Values Extend to Depth.

Values Extend to Depth.

The Jumbo shaft, Mr. Leonard states, is now down we feet and the values obtained at that depth are as high as those found nearer the surface, which caused such great surprise. The mining company is not, however, shipping at this time and is not making public any information relative to the property. The reticence of the officials of the company, Mr. Leonard states, is due to the fact that they have instituted proceedings for the annuiment of an option given to Butte parties on a large block of stock in the Jumbo, and a large block in the Red Top mine. The mining company is asking that the option be annuilled on the ground no consideration was given for the option. The proceedings are likely to settle the quistion as to whether or not an option, for which no consideration is given, is binding.

Great Hope of Manhattan.

Great Hope of Manhattan.

The Red Top mine, Mr. Leonard states, is showing up well and the Sandstorm is proving a greater bonanza than the owners expected. The Kendall is shipping ore to the value of \$100 net dully, and has been doing so for the last ten days. Mr. Leonard states that there is in progress at present a great rush to the new camp of Manhattan. The camp is but six months old, but has a population of 2000 people, three banks and every line of business represented. It is expected that by spring the new El Dorado will have 5000 people.

DAY ON 'CHANGE.

Thursday Was Good Day for Holders of New York.

of New York.

Thursday on the local 'change was New York's day, over 20,000 shares of this stock clenging hands. Good rejects are being heard from the New York, and it is apparent that they are seeind enough to create no end of confidence in the stock. The average price of stock sold Thursday would be very near 20 cents, and a higher price is anticipated among the brokers.

Daly-Judge, Lower Mammoth and May Day still continue in demand, good sales being registered yesterday. Prices still remain sound with an inward tendency. A total of CSE shares was sold Thursday, which turned the sum of 23, 546, 56. The quotations for the day closed as follows:

# INTEREST IN EAST

Boston Generally Impressed With Mining Future of the Mormon State.

VIEWS HAVE CHANGED DURING PAST YEAR

Familiarity Shown in Circles Not Generally Conversant With Mining Industry.

his city for several weeks on business throughout the East, returned Wednesday evening from New York and Boston greatly impressed with the standing of Utah properties throughout the Eastern markets. A year ago Mr. Rice was in the East, and a person then talking Utah or Nevada was looked upon by the then conservative East as a prospective vendor of proverbial gold bricks. The change from this attitude is remarkable, both by reason of the short time necessary for the change to occur and in its encerity and antensity.

Air Full of Consolidation.

Air Full of Consolidation.

Men of the walks of life and avenues of industry not usually familiar with the mining industry of any portion of the country are competent to talk intelligently about Bingham and other Utah camps of prominence and of many centers of interest in Novada as well from Ely to Bullfrog. They are acquainted with the history of properties and districts, and there exists what may well be termed a flattering and sincere estimation of the mining possibilies and certainties of this State. Mr. Rice says that the air is full of copper consolidation rumors, with Utah as the headquarters of all the huge mining deals.

Fortunate Chicago Investor.

Fortunate Chicago Investor.

Fortunate Chicago Investor.

In Chicago interest has not been so centered on Western mines the people thinking more of other stocks than of gold and copper certificates, which now command the respectful attention and ready dollars of the quondam conservative element of the East. One important Chicago investor, however, became convinced that Nevada was a good field for some ready capital, and after sending a man into the State to investigate, put over \$150,000 in nineteen separate ventures. Up to the present time fourteen have proving more than satisfactory and remunerative, a result more remarkable than characteristic of such ventures.

Boston Thinks Well of Utah.

Boston Thinks Well of Utah.

Nothing is occupying the attention of the Boston investor as Utah and Nevada copper propositions, reports of which have been sifting through the distance for some time past, but to thoroughly appreciate the demand for and interest in this line of activity one must see for himself. A mining man from Utah in Boston these days is a target for immediate interest.

NEVADA CON. WILL ENLARGE.

Additional Property and Larger Tonnage Than Expected the Cause.

mage Than Expected the Cause.

Mr. F. W. Bradley of San Francisco, has been in Boston during the past week, says an Eastern exchange. He is best known as the president of the Alaska-Treadwell company and president of the Bunker Hill-Stillvan company of the Coeur d'Alene district. He is also consulting engineer of the Nevada Consolidated Copper company. Mr. Bradley estimates that this company has a tonnage blocked out today of approximately three times that estimated by Mr. Channing a few months ago.

Will Increase Reduction Block.

Will Increase Reduction Plant.

Will Increase Reduction Plant.

It will be remembered also that the company's plans for a reduction plant looked forward to an output in a year or two hence of about 2000 tons per day. The company has acquired additional property recently, with which goes very valuable additional water rights, and it is estimated that the company today will be justified in looking forward to a plant capable of reducing 10.00 tons per day. It has, therefore, been thought wise to increase the size of the first unit from 1000 to 2500 tons per day Immediately.

Is Attracting Attention.

Is Attracting Attention.

There is probably no camp in the West atracting more attention today than that at Ely, Nev. The proportions which this Nevada Consolidated Copper company's property has assumed are far and away beyond any anticipations held by the country when the stock was at 5 per share.

GREAT BEND DISCOVERY.

Davis-Loftus Leasing Company Is Fortunate Finder of Ore.

It was learned from Goldfield Thursday that the recent strike made on the Great Bend property, in that camp, in which several Salt Lake people are interested, was made on a 400x00-foot lease held and operated by the Davis-Lottus Leasing company. The ledge in which such sensational values have been uncovered was discovered by a system of trenching the leasers resorted to, and subsequently in a seventy-foot shaft the same ledge was struck, carrying fine values.

struck, carrying fine values.
The leasers will begin shipping the ore The leasers will begin shipping the ore extracted from the shaft within twenty days, all that has been mined being sacked as it comes from the shaft. The ore is said to be very rich, and the outcome of the shipments to be made will be watched with great interest. The Dayis-Loftus Leasing company is the organiza-tion that has been uncovering such sen-sational values on the Sandstorm, whic have contributed not a little to the great advance in Goldfield stock values.

INSPECT BLACK DIAMOND.

Indiana Director Arrives to Look Over Stockton Property.

William E. Beach of Lafayette. Ind., one of the directors of the Black Diamond Mining company, is in the city, and will leave for Stockton to inspect the mine with General Manager Alexander before his departure for the East. Mr. Beach is prominent in financial and political circles of the Hoosier State, and has a number of mining interests in Utah and the West.

WABASH MEETING.

Stockholders Will Meet on the Fifteenth of February.

The impression erroneously has been gathered that the meeting of the Wabash stockholders to make radical changes in the plans of the company is to be held on the 22nd of this month. The correct date is the 15th of this month, and the hour set is 1 o'clock.

Ore Shipments.

The Pioneer sampler reports the fol-lowing number of cars of ore received Thursday: Nevada, 3: Tintic, 2: Bing-The Taylor & Brunton sampler report-ed: Tintic, 12; Bingham. 1; Fish Springs, 1

Metal Market. The metal quotations for Thursday sere as follows: Silver, 60%; lead, \$1.500 5.00; copper, 17%c.

#### GOOD PLACE TO SECURE A MINE

Manhattan Presents Chance in Nevada for Investors in Property.

Goldfield, and in fact all Nevada, still continues to look forward to securing a slice of Manhattan ground, and from re-ports that reach this city from the scene of this latest excitement center the rush into the new district is not yet reaching ts end. It is said that no camp in all Nevada offers more inducements for the investor, especially the investor with limited means, than this, and opportuni-ties are being grasped on all sides by the men with ready cash.

Individual Holdings Are Large.

Individual Holdings Are Large.

Perhaps the reason for the case with which bargains can be secured is that during the first staking days those who arrived on the ground early staked about everything in sight. They secured more than can be handled by a man of limited means, and they are now willing to part with a portion of ground that they may secure means to develop the balance. A little ready cash, according to one who has been in the country, will bring results much faster than hurting one's self getting into the camp before the rush began.

High Values of Ore.

High Values of Ore.

On the original discovery ground located by Mr Humphrey, where such sensational values were disclosed, work has been continued steadily for several weeks, mostly by the leasing system, and developments are said to be remarkable for even Nevada. From shipments made from the April Fool claim, belonging to Humphrey, about \$400 per ton was the net profit. On other claims in the group assays have been made that gave results as high as \$230 per ton.

Camp Building Up Fast.

Camp Building Up Fast.

Development work is being rapidly pushed by both leasers and owners, and it is estimated that at least \$90,000 per week is the total output of the various properties surrounding Manhattan. About 690 buildings have been erected in the camp, and it is said that the camp gives every promise of growing and improving as fast as Goldfield, which had a phenomenal growth.

STRIKE AT BEATTY.

Water Center of Nevada Has New and Good Showing.

and Good Showing.

Beatty, Nev., the place famed in the descrit regions for having an ample supply of free water for all comers, and the site of the mill with which the great Shoshone mine will handle its ore, is the scene of a great strike, which is considered significant in that it shows the extension of the mineral beit to be much longer than was thought. The Autora Bullfrog property is the scene of the strike, and a large ore body is encountered that averages in gold from \$34 to \$331.

The character of the ore is said to be.

The character of the ore is said to be like that of the Shoshone, having more fragmentary quartz, however, in its composition than the Shoshone at a like depth. A tunnel has been driven on the property about 150 feet, the vein being encountered at a vertical depth of seventy-five feet. The discovery has created no end of interest in Beatty and the surrounding camps.

INTERESTED IN BIG SMELTER.

E. H. Hamilton of Anaconda Is in the City for Few Hours.

E. H. Hamilton of Anaconda passed through this city Thursday, on his way East. Mr. Hamilton is prominent in the mining cirles of the West, being extensively interested in the Washoe Smelter company, which is noted far and wide for its proportions and importance to the mining world. The Washoe Smelter in December last made a copper output of 15 392,400 pounds, breaking all previous records.

left last night for the Spruce Mountain country. Mr. Black stated Thursday that the copper developments on the old Latham property are most significant, the vein giving very high percentages in the red metal on the 500-foot level, and there is a vest amount of the ore in sight. There is a great deal of activity in the region from Spruce mountain to Ely, a district destined soon to be the scene of a wild rush and to be numbered with practically surface development amons the copper-producing regions of the State of Newada. A number of prospectors are now going through this country on their way from Manhattan.

NO NEWS OF MERGER.

Park City Consolidation May Still Be Hanging in Mid-Air. While no definite news has reached Sali

Lake either from deeply interested Ohio and New York patrons or from the re-ported conference between J. E. Bamberger, president of the Daly West, and berger, president of the Daly West, and W. S. McCornick, regarding the merger of Park City properties, it is thought that the proposed deal is very near a successful solution, and that definite details will be forthcoming soon.

It was understood generally that the limit to the deal was the list of last month, but if this was true the interests involved are keeping the result of their negotiations from the public very successfully.

Boston Copper Letter.

Boston Copper Letter.

James A. Pollock & Co. furnish the following copper letter and news from Boston. received over their private wire. "Profit-taking and fractional recessions were seen, but a good, strong undertone was manifest until closing."

"A New York dispatch to the Herald says the best information obtainable is that third parties have agreed to buy control of the Heinze properties, and the Amalgamated is in a way directly interested. One report was that Thomas F. Cole was the leading agent in bringing about peace between the conflicting Montana copper interests. At a recent dinner at Sherry's, H. H. Rogers is reported to have said: If our Montana competitors were all like you, Cole, there would be no warfare in copper.

"Repairs to North Butte hoisting made and hoisting through own shaft resumed today. Massachusetts output for January, 3709 tons; Tamarack, 459 refined, Isle Royale, Its refined; Ahmock, 128 refined, Mohawk, 55 tons.

"Accompanying the strength and advance in both Amalgamated and United Copper stocks today comes the following on the broker wires from New York, Heinze and Amalgamated Copper papers were signed this morning, details are not known, but this evidently means the end of all law suits."

Encouraging Rumors.

President Treweek has returned to Salt Lake, after a visit to the Wabash mine. The Colonel reports everything satisfac-tory at the mine. He states that Park City is full of encouraging rumors re-garding the developments on the Daly Judge, Little Bell and New York proper-ties.

Mining Notes.

W. O. Filer of the Twin Falls Land and Water company left for his home in Sharon, 'es., Thursday evening, being called by the udden death of his father.

O. F. Page of the Western Mining company is in Nevada Inspecting properties in which is in Interested. Superintendent Day of the Yampa smelter was in the city Thursday from Bingham.
Willard F. Snyder returned from the East Thursday night

A. J. Weber and Joseph Christiansen, State Treasurer, have returned from a ten days' in-spection tour of Virginia City, Nev. They are interested in the lately organized Chicago-Nevada Mining company, with property in that district General Manager Doollitle of the Bingham-New Haven Copper and Gold Mining company is in the Disis country inspecting his in-terests. The local offices have been removed to 400-401 Herald building.
